COLLOIDS **for** LIFE LLC

## Colloidal Mineral Supplements

Supplement your immune system and enhance your mental energy with natural, high quality colloidal minerals.

Colloids for Life, LLC offers pure, natural, drug free products designed to optimize your health. Our colloidal minerals work with your body's natural processes to enhance your immune system and neural functions. Colloidal silver and Colloidal gold are safe dietary supplements with no side effects.

Colloids For Life's mission is to provide you with the highest quality and purest colloidal and nutritional supplement products.

In this product brochure we will discuss:

- Colloidal Minerals
- Mesosilver®
- Mesogold®
- Mesocopper®
- Mesoplatinum®
- MesoSilica®

Colloids For Life offers the highest quality colloidal minerals to give you a healthy, longer life. For more information and a complete list of products visit us at [www.colloidsforlife.com](http://www.colloidsforlife.com)

## What Is A Colloidal Mineral?

A colloidal mineral is a supplement that is capable of providing the body with certain minerals that help you maintain an optimum level of health. Minerals are able to help the body build soft tissue and other essential life-sustaining elements in your body.

### These include:

Soft tissues

Ligaments

Muscles

Tendons

Skeleton

Minerals are also able to help regulate body function includ

Heartbeat

Nerve Response

Transport of Oxygen

Blood Clotting

Internal Pressure of Body Fluids

## What Is Colloidal Silver?

### Colloidal Silver Products Can Help You Live A Healthier Life

Silver has been used since the 19th century to help benefit the body. In the years prior to 1938, **colloidal silver products** were commonly used by doctors as an antibiotic treatment. Since production of these products was typically expensive, however, the pharmaceutical companies stopped producing these products and moved on to others that were more lucrative to produce.

At ColloidsForLife.com, we are able to offer pure colloidal silver that will provide you with the real benefits you are looking for -- not just an ionic solution or a mild protein solution. With Mesosilver®, you can take advantage of the minerals provided by a mineral colloid that has been successfully used against disease for over fifty years.

## Mesosilver®

### Industry Leading Mesosilver® is the Natural Way to Achieve Optimal Health

Mesosilver® is a true colloidal silver consisting of pure, sterilized water and pure silver particles.

The particles in Mesosilver® are 0.65 nanometers in diameter, the smallest available in a silver colloid.

It is the small particle size combined with high particle concentration that makes Mesosilver® the most effective colloidal silver available.

Mesosilver® supplements your immune system to fight pathogens.

## Methods of use for Mesosilver® include the following:

### ■ Ingestion

- Pathogens. In the bloodstream bacteria, viruses and other pathogens are fought with the silver particles.
- The effectiveness of silver particles that circulate in the bloodstream is to a large extent determined by the particle surface area that is available to come in contact with pathogens.
- High particle surface area colloids such as Mesosilver® have most of their silver content contained in the silver particles.

### ■ Silver Bandages

- Band-Aid type dressings soaked in few drops of colloidal silver can conveniently be applied while wet. Such applications will kill the bacterial in an open wound and prevent infection.
- A wet Band-Aid type dressing will kill the infection and relieve pain, in many cases, in less than one hour. Band-Aid type dressings or larger gauze pads fight infection and speed the healing of burns, abrasions and cuts on the skin.

### ■ Sinus Flooding

- Flooding the sinus cavities effectively brings the Mesosilver® in contact with pathogens that cause sinus infection and influenza.

# Mesogold®

**Join with thousands of others and Improve the quality of your health, your performance, and your life.**

Mesogold® is the safest, most effective colloidal gold available.

- Contains pure water and pure gold particles, no other elements 20 PPM
- Most effective product in the market due to the smallness of particles, 3.2 nanometers
- Infinite shelf life, requires no refrigeration
- Tasteless like water

Methods of use include the following:

## **Providing relief from:**

- Stress, anxiety and depression
- Attention deficit disorder and ADHD
- Restless legs syndrome
- Arthritis and joint pain

## **Enhance the following:**

- Focus, concentration, and mental acuity
- Vision
- Libido
- Motor skill and hand-eye coordination

# MesoCopper®

Mesocopper® is an all natural mineral supplement in the form of a copper colloid consisting of nanometer particles of 0.9999 pure copper suspended in pure deionized water.

Mesocopper® is the safest, most effective colloidal Copper available.

Copper is an essential trace mineral that facilitates the activity of enzymes. Copper provides a role in development and maintenance of cardiovascular system, including the heart, arteries, blood vessels, the skeletal system, and the structure and function of the nervous system including the brain.

Copper is a critical functional component of a number of essential enzymes, known as cuproenzymes. The copper-dependent enzyme, cytochrome c oxidase, plays a critical role in cellular energy production.

Another cuproenzyme, lysyl oxidase, is required for the cross-linking of collagen and elastin, which are essential for the formation of strong and flexible connective tissue. The action of lysyl oxidase helps maintain the integrity of connective tissue in the heart and blood vessels and plays a role in bone formation.

## Mesocopper® Uses

- Promotes healthy younger looking skin
- Helps maintain the integrity of connective tissue in the heart and blood vessels
- Functions as an antioxidant

# MesoPlatinum®

**Mesoplatinum® is a natural mineral supplement consisting of nanometer particles of 0.9995 pure platinum suspended in pure deionized water.**

Colloidal platinum produces no adverse side effects and does not combine with any substances in the body nor does it interact with or interfere with other supplements, vitamins or medications. The platinum nanoparticles pass out of the body within 72 hours leaving no residual platinum. Mesoplatinum® is a true colloid and consists only of nanometer size metallic particles platinum and no platinum ions.

Mesoplatinum® is an all natural mineral supplement in the form of a platinum colloid. Colloidal platinum does not combine with any substances in the body and produces no adverse side effects. Mesoplatinum® is a true colloid and consists entirely of nanometer size metallic particles platinum and no platinum ions.

## Mesoplatinum® Uses

- Promote healthy tissue regeneration
- Increase electrical transmission across the synapses within the brain to improve memory and mental alertness
- Promote general tissue regeneration of the neurological tissue:

## MesoSilica™

MesoSilica® is a true colloidal silica mineral supplement consisting of pure water and .999% pure silica. With 600 ppm and particles of approximately 6 nanometers in diameter, MesoSilica® is one of the most highly effective sources of silica available.

In the human body, silicon is found in the connective tissues, tendons, ligaments, cartilage, and blood vessels and it is thought that the mineral is essential for their integrity. Positive correlation has been identified between high levels of Silicon (silica) and high bone mass density, low levels of aluminum, lower levels of Alzheimer's disease, shortened time for healing of burns, and lower incidence of atherosclerosis.

### MesoSilica® Uses

- Promote healthy connective tissue
- May reduce symptoms of age related mental decline
- Rejuvenates collagen and elastin, promoting healthy younger looking skin
- Supports integrity of connective tissue in the heart and blood vessels

## Are You Wondering About The Medical Uses Of Colloidal Silver?

### The Benefits Of Colloidal Silver Are Simply Amazing!

Many people are discovering that there are a number of [medical uses of colloidal silver](#). In fact, **colloidal silver supplements** have helped people finally overcome illnesses that were not being effectively treated with traditional medicine. For these people, discovering the beneficial properties of colloidal silver was simply priceless.

Unlike other **dietary supplements** on the market today, there is research to support the benefits of colloidal silver. In fact, Dr. Robert O. Becker, who is the Author of *The Body Electric*, performed a great deal of research into the medical uses of colloidal silver in the 1970s. His research demonstrated that silver helped to promote bone growth while also killing the surrounding bacteria.

Further, an article in the March 1978 issue of *Science Digest*, also espoused the **benefits of colloidal silver**, having said: "Thanks to eye opening research, silver is emerging as a wonder of modern medicine. An antibiotic fights perhaps a half dozen different disease organisms; but silver fights some 650. Moreover, silver is virtually nontoxic."

If you are ready to take advantage of the **health benefits that colloidal silver can provide**, we encourage you to browse [ColloidsForLife.com](http://ColloidsForLife.com) – order the best supplements to aid in your natural well-being.

If you have any questions or need further information, feel free to contact us via email at [service@colloidsforlife.com](mailto:service@colloidsforlife.com) or call toll-free at 1-800-390-5839.

### [Colloids for Life Products](#)

Colloids for Life, LLC offers pure, natural, drug free products designed to optimize your health. Our colloids offer a safe source of minerals essential for optimal health.

## True Colloidal Silver vs. Ionic Silver Solution

There is much discussion about the different ways of processing silver for immune system support. Makers of true colloidal silver suggest they have the most effective product while companies making solutions of silver ions (hydrosol) claim they have the upper hand. It is interesting to note that products of silver ions often market themselves under the guise of “colloidal silver” rather than ionic silver. However, we never see the reverse where a company offering a true silver colloid markets itself as “ionic silver”.

Colloidal silver or ionic silver, does it really matter? After all, they both contain silver, right? Yes, they both contain silver, however in the case of ionic silver, the silver atoms are missing an electron, thereby changing the physical property of the element. Silver ions dissolve in water; indeed silver ions cannot exist outside of water. When water from an ionic silver solution is evaporated, what is left is a thin layer of silver oxide. Silver oxide has only very minimal anti-bacterial properties. In contrast, when we evaporate the water from a colloidal suspension of silver we leave behind a thin layer of silver particles, thereby offering the same anti-bacterial properties as the colloidal suspension.

While makers of ionic silver claim to have a more effective product, laboratory tests indicate otherwise. In independent laboratory tests, Mesosilver (true colloidal silver) was tested against a leading brand of ionic silver. Both products were tested against *Escherichia coli* (E-coli). At the end of the 24 hour testing period, the tests using Mesosilver had no measureable remaining bacteria. The tests with ionic silver, however, still showed significant bacterial activity. As a matter of fact, it took only six hours for Mesosilver to reduce the bacterial level to the level of bacteria still present after 24 hours in the ionic silver test.

Mesosilver is made by a technical process that takes very pure silver and creates a suspension of pure silver particles suspended in water. This colloidal suspension provides you with the highest bioavailability of all silver products made.

# Are You Looking For Accurate Information On Colloidal Silver?

## While Colloidal Silver Safety Isn't A Real Concern, Proper Storage Can Be

**Colloidal minerals** are very small particles of silver or gold, broken down and suspended in water. The minerals are suspended in such a way so they can be more easily ingested by humans.

With the help of the mesoprocess, the silver and gold particles are broken down into the smallest possible particles. This makes them more far more effective than other colloidal mineral products.

Still, in order to get the most out of the product, it is best to gather as much [information on colloidal minerals](#) as possible. By doing so, you can be certain to store it properly and to use it according to the dosage guidelines.

Perhaps one of the most important pieces of information on **colloidal silver** that you should know is that it should never be frozen.

If colloidal silver is frozen, the suspended particles may fall to the bottom. After thawing, if the water is clear, the product is damaged and should not be used. If the color remains normal, on the other hand, it will still provide you with the benefits you desire.

Although there are no serious **colloidal silver safety** concerns – as it is safe to use even in high doses – there are a few things you should keep in mind to enjoy the optimum benefits of this potent supplement. These include...

- Never store in an area where the temperature exceeds 80 degrees Fahrenheit
- Never store in direct sunlight
- Never drink directly from the bottle
- Never put anything such as a straw or cotton swab into the bottle
- Never pour any unused portion of the product back into the bottle

Keep these tips in mind when you use colloidal silver and you'll be able to safely enjoy the many benefits from this wonderful product.
